Inhalation:	Inhalation of fumes released at high temperature can be irritating to the lungs and fatal. No effects requiring first aid are expected during normal use. If exposed to fumes received from decomposition products, remove the person to fresh air. Seek immediate medical attention.

Safety information

Contact with skin:	None under normal conditions of use. However, irritation to those with type IV sensitivity to accelerator chemicals may occur.

In case of fire:

Flammability:	Combustible at high temperatures.
Products of Combustion:	Once ignited latex will continue to burn releasing dense smoke. The products of decomposition are hazardous and consist of carbon dioxide, carbon monoxide and hydrocarbons.
Firefighting media:	Water spray, dry powder, carbon dioxide, alcohol-resistance foam. Inhalation of fumes must be avoided. Fire fighters should wear the appropriate breathing apparatus and adequate skin protection to protect from thermal combustion products.
Storage:	Store in a cool, dry place away from direct sunlight and sources of ignition.
Transport:	No transport warnings required; the gloves are not classified as hazardous.
