

Product Main Number 1000021310

## Shaped pad, ABENA San Premium, 8, orange colourcode

- ✓ High performance core with Top-Dry Technology
- ✓ 360° leakage protection preventing leakage all around
- ✓ Wetness indicator with graduation scale
- ✓ Support healthy skin balance
- ✓ Cost-effective solution
- ✓ 100 % breathability for healthy skin and optimum comfort
- ✓ Anatomically shaped for better fit
- ✓ Odor Control

### Product Description

ABENA San 5-12 is our Premium range of anatomically shaped pads for moderate to heavy incontinence. The high performance core with Top-Dry Technology supports optimal skin care by keeping the exposed area comfortable and dry even after multiple voids. The fully breathable pads are fitted with standing leakage barriers combined with front and rear built-in cross barriers offering 360° leakage protection. When combined, these functionalities help protect the skin and maintain a natural skin balance. The Odor Control system minimizes unpleasant smells. The wetness indicator with graduation scale guides the user and caretaker to the product with the right absorption level and product changes. The dermatologically tested products have been given the Nordic Swan Ecolabel. ABENA San in sizes 5-12 should always be used with special fixation underwear, like our fixation pants, to ensure a tight fit and reduce the risk of leakage. ABENA's two-piece systems, consisting of a fixation pants and an incontinence pad, are a cost-effective solution.

### Specifications

|                                  |  |

| Product Disposal Instructions    | Can be disposed of with normal household waste sorted according to local regulations.  |

**Packaging Disposal Instructions**

Can be recycled or incinerated.

**Instructions for use/application**

Bladder protection pads for moderate to heavy incontinence. Easy product size recognition by color codes, names, and numbering systems. ABENA San products are suitable for all needs and body shapes since they are applied between the legs, and not around the abdomen and hip. ABENA San 5-12 should always be used with special fixation underwear, such as our fixation pants. The fixation pants ensure a tight fit and reduce leakage risks. Pull the fixation pants half-way up the legs. Fold the pad lengthways to create a bowl shape. Pass the pad between the legs from front to back. Position the upper rear end of the pad at the tailbone. Fan out the back of the pad horizontally to create a channel shape between the legs. Use the wetness indicator to check if the product is applied accurately in the center. Fan out the pad horizontally at the front. Pull up the fixation pants into position.

**Packaging data**

Nordic Swan Ecolabel is an official Scandinavian environmental label. Products with the Nordic Swan Ecolabel meet stringent environmental requirements with regard to raw material, production, use, documentation, and safety.

Regulation (EU) 2017/745 is a regulation of the European Union on the clinical investigation and sale of medical devices for human use. It repeals Directive 93/42/EEC, which concerns medical devices, and Directive 90/385/EEC, which concerns active implantable medical devices, on 26 May 2021.

The CE mark guarantees that a product is safe to use and complies with all safety precautions. CE stands for Conformité Européenne (European Conformity) and is mainly found on electronic equipment, safety equipment, construction products, and medical devices.

The UKCA mark guarantees that a product is safe to use and complies with all safety precautions in line with product standards and legislation of the UK.

Leakage barriers in the leg cut and around the absorbent core help prevent leakages and provide an optimal fit.

Your guarantee that our products have been tested for ingredients which can potentially cause skin irritation. Tests conducted by an independent third-party laboratory.

The unique structure of our high performance core is designed for fast dispersion and encapsulation of urine, which results in a dry surface even after multiple voids.

Odor control is a critical factor in ensuring discreteness for the user. ABENA's incontinence products are designed and engineered to ensure that minimal Odor arises from the product.

Wetness indicator is a liquid-sensitive strip that changes colour or fades out indicating when it is time to change the product.

A combination of 100% breathability, Top-Dry and leakage protection provides a dry surface and healthy skin even after multiple voids maintaining the skin's natural pH balance.

The product is fully breathable for the comfort of the user; also during long-time use. Helps maintain skin integrity.

Unique Top-Dry Technology that provides a rapid absorption and ensures a dry surface even after multiple voids.

The product does not contain latex.

The bag is 30% PCR, which means made from plastic materials used by consumers. This will allow us to reduce our plastic waste and to help take care of the environment.

Drop system indicating absorption. The more drops, the higher the absorption. Ranges from 1 to 12 drops.
